

Warning: SLIME IS SLIPPY. Not suitable for children under 3 years old due to small part choking hazard. Adult supervision required at all times. If Slime gets on the floor/surfaces wipe it up immediately. If product gets into eyes, wash with water for 10 minutes. If symptoms persist seek medical advice. Non-irritant formula. For sensitive skin, test a small amount on skin first. Ingredients are printed on the packaging. Non-edible product. DO NOT EAT. If product is swallowed, drink plenty of fresh water. Product is non-toxic. To avoid possible staining, do not let skin come in contact with powder prior to adding water. Slime forming. Whilst making your slime, we recommend stirring with a large spoon or spatula. Do not empty onto grass. Keep packaging for future reference.

Warning: SNOPLAY CAN BE SLIPPY - Especially on flat surfaces. Not suitable for children under 3 years old due to small part choking hazard. Adult supervision required at all times. If product gets into eyes, wash with water for 10 minutes. If symptoms persist seek medical advice. Non-irritant formula. For sensitive skin, test a small amount on skin first. Non-edible product. DO NOT EAT. If product is swallowed, drink plenty of fresh water. Product is non-toxic. Figures and colour may vary from those illustrated/show on packaging. Keep packaging for future reference. Do not leave large clumps on grass. If used outside, ensure snow is rinsed off painted and wooden surfaces after use.

- Try picking up the Slime Play with Sieves and colanders to create a slimy waterfall!
- It's Sensory slime time! Make up a bowl or container of gooey Slime Play.

- Fill your Tuff Tray with SnoPlay
- Add in some of your favourite arctic animals to begin your snowy, arctic adventure!
- Replace the snow with Blue Slime Play & sea life animals to create a slimy sea world.

SENSORY SLIME TUB!

SNOWY TUFF TRAY!

RLFAUK269

MAGICAL GELLI MOULDS!

- Create at least 4 bowls of Gelli Play using different colours (following the modelling instructions)
- Have fun and get creative; building shapes, characters or even Gelli sandcastles!

GELLI JUNGLE TUB!

- Create a bowl or container of colourful, green Gelli Play
- Add your favourite jungle animal figures, then let your imagination run wild!
- Perfect for sensory play
- A unique way to discover the animals that live in the Jungle

100% RECYCLABLE BOXES, BAGS AND LEAFLETS

PRODUCT INSTRUCTIONS AND IDEAS

Please make sure you're definitely following the correct instructions before you begin!

For more sensory tub, imaginative play and tuff tray inspiration visit: www.ZimpliKids.com/Ideas

Warning: GELLI IS SLIPPY. Not suitable for children under 3 years old due to small part choking hazard. Adult supervision required at all times. If Gelli gets on the floor/surfaces wipe it up immediately. If product gets into eyes, wash with water for 10 minutes. If symptoms persist seek medical advice. Non-irritant formula. For sensitive skin, test a small amount on skin first. Ingredients are printed on the packaging. Non-edible product. DO NOT EAT. If product is swallowed, drink plenty of fresh water. Product is non-toxic. To avoid possible staining, do not let skin come in contact with powder prior to adding water/Gelli forming. Whilst making your Gelli, we recommend stirring with a large spoon or spatula. Do not empty onto grass. Keep packaging for future reference.

1. When your Slime Play adventure has come to an end, add more water to dilute the Slime into a drainable liquid.
2. The water will remain coloured, but the Slime will be thinner and can easily be drained away. Carefully pour your Slime down the toilet and flush.
3. Rinse your container in the sink, to remove any excess Slime.

Please note: This should be done by an adult.

STEP 2: DISPOSE OF YOUR SLIME

- Why not use colanders, spoons and spatulas to scoop up the slime and see how the slime flows through the holes?**
3. Once the Slime is fully formed, you can then add more water to thin it out. Do not exceed 10 Litres/338 fl oz.
 2. Gently sprinkle the Slime powder **slowly and evenly** over the surface of the water, and stir occasionally with a large spoon or spatula. To avoid possible staining, do not let skin come in contact with powder prior to adding water or Slime forming. The longer you mix it, the thicker it will get.

1. Start by filling a bowl or container with warm water. **DO NOT USE BOILING WATER.** For really thick Slime you can use 2 Litres /67 fl oz. However we recommend starting with 4 Litres/135 fl oz per bag of Slime powder.

MODELLING

STEP 1: MAKE YOUR GELLI (Modelling)

1. Start by filling a bowl with 4 Litres/135 fl oz. of warm water. **DO NOT USE BOILING WATER.**
2. Gently sprinkle the **STEP 1** Gelli powder slowly and evenly over the surface of the water, and stir occasionally with a large spoon or spatula. To avoid possible staining, do not let skin come in contact with powder prior to adding water or Gelli forming.
3. Leave the Gelli for 30 minutes, until it reaches a mouldable consistency.
4. Repeat the above steps with other Gelli colours. We recommend creating a minimum of 3 colours.
5. Time to get creative! - Use all the Gelli colours to mould shapes, characters or even Gelli castles!

Why not use cookie cutters to easily cut out and mould fun shapes?

STEP 2: DISPOSE OF YOUR GELLI

Please note: This should be done by an adult.

1. When you're finished, gather all the Gelli together and evenly sprinkle the **STEP 2** powder over the Gelli Play, to help dissolve it into a drainable liquid. You may want to do this in buckets.
2. The water will remain coloured, but the Gelli will be thinner and can easily be drained away. Carefully pour your Gelli down the toilet and flush.

Gelli Play is certified bio-degradable and will not block toilets.

3. Rinse your container in the sink, to remove any excess Gelli.

1. When you're finished, add your Sno to a bucket. Then evenly sprinkle the **STEP 2** powder over the Sno Play, to help dissolve and dilute it into a drainable liquid.
2. Carefully pour your Sno down the toilet and flush.
3. Rinse your container/bucket in the sink, to remove any excess Sno.

Please note: This should be done by an adult.

STEP 2: DISPOSE OF YOUR SNO

Why not try adding some Arctic animals for added sensory play?

3. Mix thoroughly with your hands, then your Sno is ready to use!

Top tip: Cold water will make the Sno feel much more realistic!

2. Pour approximately 1.2 Litres/40 fl oz of water onto the powder and watch it magically expand.
- Note:** Sno Play powder expands a lot, so make sure you use a large bucket or container that holds at least 2 Litres/67 fl oz.

1. Pour one bag of **STEP 1** Sno Play powder into a suitable container.

STEP 1: MAKE YOUR SNO

STEP 1: MAKE YOUR GELLI (Sensory)

1. Start by filling a bowl or container with warm water. **DO NOT USE BOILING WATER.** We recommend starting with 4 Litres/135fl oz.
2. Gently sprinkle the **STEP 1** Gelli powder **slowly and evenly** over the surface of the water, and stir occasionally with a large spoon or spatula. To avoid possible staining, do not let skin come in contact with powder prior to adding water or Gelli forming. The longer you mix it, the thicker it will get.
3. Once the Gelli is fully formed, you can then add more water to thin it out. Do not exceed 12 Litres/405 fl oz.

Why not try adding some dinosaur figures to create a prehistoric sensory tub?

STEP 2: DISPOSE OF YOUR GELLI

Please note: This should be done by an adult.

1. When you're finished, you can evenly sprinkle the **STEP 2** powder over the Gelli Play, to help dissolve it into a drainable liquid. You may want to do this in buckets.

2. The water will remain coloured, but the Gelli will be thinner and can easily be drained away. Carefully pour your Gelli down the toilet and flush.

Gelli Play is certified bio-degradable and will not block toilets.

3. Rinse your container in the sink, to remove any excess Gelli.
